5. Please comment on any aspect of this recitation.

333974. The teaching assistant (Kevin Kircher) knew what he was doing and knew how to teach the material covered. Quizzes and homework were graded fairly. The ta walked around and made sure everyone knew what they were doing. This course really helped me understand what was happening in lecture.

333996. Very organized and recapped the previous lecture. Helped me understand the key points in the course material.

333979. It is extremely organized and well planned out.

333991. Discussions outlines important concepts and formulas very clearly. Practice problems were helpful in the homework. I didn't like the application exercises because it think they took away time from covering the actual material.

333975. His notes are very structured and organized, which works very well with my learning style. He also is very open to helping students when they have related or further questions about the subject matter.

333985. Kevin was a great teacher who had the most organized recitations I have seen so far. He speaks eloquently, rarely makes mistakes, and answers almost all the students questions. Overall, one of the best I've had in recent memory.

333978. Not a fan of workshops

333998. Kevin was a really great TA and really helped me learn the material.

333983. Some of the workshops were confusing at first, but in the end I think they were a very useful addition to the class.

333990. Very good in the sense that it reviews material in lecture. Pace could have been a bit quicker and practice problems could be a bit harder.

Besides that, Kevin does a great job in presenting material clearly and neatly, which really helps clear up some of the information from lecture, when necessary.

333988. He is knowledgeable and a great assistant

333986. Great teacher.

333976. I thought that the instructor could've given us a worksheet with maybe 5 or 6 problems on it instead of trying to explain everything initially. I learn better when I'm actually doing the problems and I didn't get much out of his recitations.

333970. Workshops sucked.

333992. I thought the examples were really helpful and on point, I liked the way he boxed the formulas and made everything very easy to understand and write down, and I thought he had a really good understanding of all the concepts we needed to know. My only regret is that his office hours were during one of my classes, so I was never able to attend them. And they were probably really helpful, too!

333993. Notes were written in a very organized manner on the blackboard, prelim reviews were incredibly helpful.

333977. Recitation was great! Learned a lot in there, but the WORKSHOPS WERE BORING AND NOT WORTH IT!

333981. TA is always friendly and organized, and from what I understand a lot better than most TA's. However, the workshops were worse than useless. Also, the sections did not really help me understand much.

333980. Very clear. Problems were tackled in a manner that built up on the results of previous problems, so there was a logical progression.

333982. I found that it was extremely helpful when he was lecturing and stoping to have us do problems.
6. Would you recommend this TA to someone considering taking a course assisted by him or her?

333974. Yes. I know the TA is fair and good at what he does, and would therefore recommend him to other students.

333976. Yes.
